

Vanessa Sochat

vsoch.github.io

PROFESSIONAL SUMMARY

Software engineer that learns quickly, and works with passion and urgency. Expertise includes:

- Container technologies and registries
- Converged computing and Kubernetes
- Next-generation graph scheduling
- Orchestration of scientific workflows
- Continuous Integration
- Binary Analysis
- Web interfaces and APIs
- Machine Learning

EXPERIENCE

Computer Scientist, Livermore Computing: *Lawrence Livermore National Laboratory, Livermore CA*

February 2021 – present

- Expertise in converged computing, batch orchestration between cloud and HPC
- Lead developer of the [Flux Operator](#) for Kubernetes and the [Flux RESTFul API](#)
- Lead developer for the [Metrics Operator](#) to run and assess performance of HPC apps in Kubernetes
- Leading HPCIC for developer tooling, cloud initiatives, annual survey, and workflows
- Continuing to host and produce the [Developer Stories podcast](#) and Singularity associated tools
- Designed, ran, and wrote up experiments to compare ABI compatibility tools

Software Engineer, Research Computing: *Stanford University, Stanford CA*

Sept 2016 – January 2021

- Systems engineer and architecture, infrastructure and standards development, and specialized technical consultation to better ensure reproducibility of scientific computational analyses and workflows
- Implemented [Snakemake Google Life Sciences](#) executor backend using several Google Cloud APIs
- Host and producer of [Research Software Engineer Stories podcast](#)
- Designed the [Scientific Filesystem](#) for organization and discovery of scientific applications
- Developer of [Singularity Hub](#), [Singularity Registry](#), and original developer for [Singularity](#) containers
- Lead of open source project [The Experiment Factory](#) for reproducible behavioral experimentation
- Implemented and serviced image processing pipelines for the School of Medicine.
- Complete list of work available at <https://vsoch.github.io/work>

PhD Candidate, Poldrack Lab: *Stanford University, Stanford CA*

June 2011 – Aug 2016

- Designed and developed a Dockerized infrastructure, [expfactory.org](#), to deploy web-based experiments
- Conceptualized and implemented open source software, [Wordfish](#), for generating custom NLP pipelines
- Created an [interactive, reproducible workflow](#) to for genomic, behavioral, and brain imaging analyses
- Identified [optimal parameters](#) for comparison of statistical brain maps using classification framework
- Imagined and created web viewers for brains using [nodeJS](#), a [neuroimaging data model](#), and [FileReader](#)
- Built clinical [web application](#) to explore anatomical and genomic features associated with brain tumors

- Built model and [database](#) to classify artifact in functional MRI using regularized logistic regression
- Created complicated analysis pipelines in a HPC environment to analyze thousands of brain images

Data Technician, Laboratory of Neurogenetics: *Duke University, Durham NC*

May 2009 – May 2011

- Coded and deployed image processing pipelines in HPC environment using python, bash, and Matlab
- Wrote custom tools to check the quality of brain images, organize data, and interact with participants
- Responsible for creating and administering a battery with over 30 cognitive paradigms using Qualtrics

Founder, Goggles Optional Podcast: *Stanford University, Stanford CA*

Nov 2013 – present

- Developed and currently maintain infrastructure for a weekly science podcast with over 50K downloads
- Weekly responsibility to generate episode content, update databases, and publish

Student Director, Informatics Concentration for MD Students: *Stanford CA*

May 2013 – May 2015

- Organized quarterly sessions for approximately 30 medical students interested in informatics
- Set up social media groups and advertising for MD student recruitment

Teaching Assistant, Biomedical Image Analysis and Interpretation: *Stanford CA*

Jan 2013 – May 2014

- Created new course content for 10 lectures, including interactive slides and class handouts
- Single handedly developed two new projects, including a database of “cookie tumor” images
- Taught weekly section meetings, and gave two full lectures on machine learning and neuroinformatics

SKILLS AND QUALIFICATIONS

Computer Experience

<i>Languages:</i>	Go, Python, shell, Groovy, R, JavaScript, Matlab, web
<i>Databases:</i>	MySQL, PostgreSQL, neo4j, couchdb, Big Query, sqlite3
<i>Infrastructure:</i>	Kubernetes, Docker, Singularity, VirtualBox, Vagrant
<i>Visualization:</i>	D3, canvas, Shiny (R), Photoshop, Illustrator, Maya, Blender

Data Analysis

<i>High Performance Computing:</i>	Flux Framework, MPI, SLURM, SGE, HTCondor
<i>Data Structures</i>	JSON, xml/RDF, yaml, hcl

Web Development

<i>Frameworks:</i>	FastAPI, Django, Jekyll, Flask, Wordpress, nginx, wasm, uWSGI
<i>Cloud Technology</i>	Google Cloud, AWS, IBM Cloud
<i>Continuous Integration</i>	GitHub Actions, CircleCI, Travis
<i>Version Control</i>	GitHub, GitLab, Bitbucket, Gogs

EDUCATION

PhD, Biomedical Informatics: *Stanford University, Stanford CA*

Sept 2011 – Aug 2016

- Stanford Graduate Student Fellowship (Albion Walter Fellow)
- Microsoft Graduate Women's Scholar (2012)
- National Science Foundation Graduate Fellowship

BA in Psychology and Neuroscience: *Duke University, Durham NC*

Aug 2005 – June 2009

- Magna Cum Laude, Dean's List, Member of Psi Chi, the National Honor Society in Psychology
